

Virology Monthly Performance Data

The graph below shows the last 5 months performance data for Serology and Molecular testing performed in Virology. The department has set the KPI at 90% for both sections. Please see specific pages for individual test turn-around times. If further information is required, please contact the Lead Biomedical Scientist for Virology, contact information is on the Laboratory Information page.

Please note that the Molecular data **excludes** the CT/NG Screening assay. This has been removed from this data due to significant analyser downtime which significantly impact the overall TAT. If specific CT/NG TAT data is required please contact the Lead Biomedical Scientist for Virology.
